EDUCATION

2021-2022
N.S. PUBLIC SCHOOL
12th CBSE BOARD

2022-2025
MANGALMAY GROUP OF INSTITUTE
Bachelor of Computer Application

2025-2027
MANIPAL UNIVERSITY - JAIPUR
Masters of Computer Application

PRO.SKILLS

- HTML
- CSS
- JavaScript
- Tailwind.css
- MongoDB
- Express.js
- React.js
- node.js
- Mongoose
- Nodemon
- Figma
- Git/Github
- GitLab
- JWT
- VS Code
- wireframing
- ui/ux design
- GSAP
- ZOD
- Vercel
- Render
- CORS
- npm
- Postman
- API

PROFILE

I'm Jyoti Ranjan Rout, a MERN stack web developer skilled in HTML, CSS, JavaScript, ReactJS, Tailwind CSS, GSAP,andAPI integration. I have also learned backend development using Node.js, Express.js, MongoDB, Mongoose, Nodemon, and JWT authentication, enabling me to work on both front-end and back-end to build complete web applications. I have completed my Bachelor of Computer Applications (BCA) from Mangalmay Group of Institute and am now starting my Master of Computer Applications (MCA) at Manipal University Jaipur. I am passionate about developing interactive, efficient, and scalable web solutions while continuously enhancing my skills in full-stack development.

PROJECTS

2024
Link: https://error404-reimagine-round1.vercel.app/

ECOMART - ONLINE CLASSIFIED WEBSITE

1. Led a 4-member team to redesign the EcoMart platform, focusing on a modern, responsive, and accessible user interface inspired by OLX.
2. Built core UI using HTML, Tailwind CSS, and JavaScript, ensuring clean component structures, intuitive category navigation, and cross-device compatibility.
3. Applied agile practices and GitHub-based version control for efficient task delegation, collaborative development, and seamless workflow.
4. KEY LEARNINGS: Strengthened leadership, collaboration, and frontend development skills in a real-world team environment.

2025
Link: https://food-app-hotplates-topaz.vercel.app/

HOTPLATES - FOOD RECIPE WEB APP

1. Developed HotPlates, a responsive food recipe web app as a solo using React.js, Tailwind CSS, and TheMealDB API, featuring dynamic recipe search, filters, and detailed views.
2. Implemented intuitive UI/UX with hover effects, smooth transitions, and consistent branding, ensuring a seamlessexperience across devices.
3. Used React Router and efficient state management to enable smooth navigation and real-time data rendering without full page reloads.
4. KEY LEARNINGS: Strengthened skills in React, API consumption, and building interactive, responsive interfaces.

2025
Link: https://sanitarywares-frontend.onrender.com

SANITARY WARES

1. Developed a full-stack e-commerce website for sanitary products using the MERN stack (MongoDB, Express.js, React.js, Node.js) with a responsive UI built using React and Tailwind CSS.
2. Implemented JWT-based authentication with separate admin and user roles, built RESTful APIs for products, categories, cart, wishlist, and orders, and used Recoil with localStorage for persistent state management.
3. Created an admin dashboard with CRUD operations, deployed frontend and backend on Render, used MongoDB Atlas for database hosting, and handled CORS, routing, and API integration using Axios.
4. KEY LEARNING: Gained hands-on experience in MERN stack development, API integration, state management, and deployment.

EXTRA CURRICULAR ACTIVITIES

- Time management
- Team handling
- Team Leading
- Communication
- Learning new technologies
- Online course completion
- Book Reading
- Gaming

PROJECTS

2025

Link:https://www.figma.com/design/PNRQtpgz4YYLUFcQLEEKsX/Landing-Page?t=pK0qKu6VnGUF3Tze-1

UI DESIGN - SANITARY WARES

Tools: Figma

Designed the UI for a sanitary wares e-commerce platform including product listing, product detail, cart, and checkout screens. Created wireframes and interactive prototypes focusing on clear navigation, product comparison, and a user-friendly buying experience. Applied consistent components, visual hierarchy, and responsive layouts to improve usability.

2026

Link:https://www.figma.com/design/gaTtNVwHmgBvJWwiqHAO2o/Signup-Signin-page?node-id=0-1&t=pK0qKu6VnGUF3Tze-1

SIGNUP UI DESIGN

Tools: Figma

Designed a clean and intuitive signup page focusing on smooth user onboarding. Created wireframes and high-fidelity UI with clear input fields, proper validation messages, and a simple layout to improve usability. Ensured responsive design and maintained visual hierarchy for a better user experience across different devices.

2026

YOUTUBE APP WIREFRAMING

Tools: Figma

Created low-fidelity wireframes for a video streaming platform inspired by YouTube. Designed key screens such as the home feed, video player, search page, and channel page while focusing on user flow, content hierarchy, and intuitive navigation. The wireframes helped structure the layout and improve the overall user experience before moving to high-fidelity design.
